Dishika Yadav

Full Stack Developer

dishikay2004@gmail.com 9179733032 Indore, MadhyaPradesh Linkedin Portfolio Github

PROFESSIONAL SUMMARY

Results-driven full-stack developer with strong analytical skills and practical experience in frontend and backend development, API design, databases, deployment, and analytics tools. Adept at building data-driven applications, rapidly learning new technologies, and collaborating effectively within teams to deliver scalable solutions aligned with business and organizational needs.

INTERNSHIP EXPERIENCE

MERN Stack Trainer, *Byte Buster IT Institute, Indore, India* 01/2024 – 06/2024 Indore

- Delivered hands-on MERN stack training to 15+ students, covering frontend and backend development.
- Reviewed and debugged student code to enhance quality and performance.

Python Full Stack Virtual Internship, *EduSkills Academy* 10/2025 – 12/2025 Remote

- Completed a 10-week Python Full Stack Developer virtual internship, gaining hands-on experience in frontend, backend, APIs, and databases.

Web Development Intern, *CodSoft* 07/2024 – 08/2024 Remote

- Built and improved responsive web components using modern web development practices.
- Demonstrated strong problem-solving skills and contributed effectively to assigned projects, receiving positive performance remarks.

EDUCATION

Bachelor of Technology in Computer Engineering, *SAGE University, Indore* 2022 – 2026

8.21 CGPA

SKILLS

Programming Languages: Python, JavaScript, SQL, HTML, CSS
Web Technologies & Frameworks: React.js, Node.js, Express.js, Tailwind CSS, Bootstrap, Shadcn UI, Framer Motion
Databases: MongoDB (NoSQL), MySQL (Relational)
Developer, Analytics & BI Tools: VS Code, GitHub, Postman, Power BI, Microsoft Excel, Vercel
APIs & Backend Concepts: RESTful APIs, API Integration, API Documentation, Authentication, CRUD Operations
Version Control & Deployment: Git, GitHub, Vercel.
Analytics & Data Skills: Data Analysis, Dashboard Development, Data Visualization, Basic Business Analytics

PROJECTS

AI Virtual Assistant (MERN-Stack + AI Integration)

- Developed a full-stack AI virtual assistant using MERN stack with voice input/output via Web Speech API and intelligent responses powered by Gemini AI.
- Implemented secure authentication, user customization features, and deployed the application for real-world usage.

Tech Stack: React.js, Node.js, Express.js, Gemini AI API, JWT

Animated E-Commerce Web Application (MERN-Stack + Framer motion)

- Designed and implemented a full-stack e-commerce platform using the MERN stack, featuring dynamic product listing, smooth UI animations with Framer Motion, and responsive design.
- Developed RESTful APIs for product management and integrated MongoDB for efficient data storage and retrieval.
- Deployed the application with a scalable architecture, ensuring seamless frontend–backend communication and optimized performance.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Framer Motion, REST APIs.

Movie Analytics Dashboard (Power BI)

- Designed an interactive Power BI dashboard to analyze movies across ratings, genres, actors, and awards, delivering clear visual insights through charts and graphs.
- Implemented slicers, KPIs, and dynamic filters to enable user-driven analysis and data-driven decision-making.

Tech Stack: Power BI, DAX, Data Modeling, Data Visualization.
